stryker

Cervical 360

Your complete cervical spine portfolio based on advanced technology

Use devices that feel like you designed them yourself.

3D-printed titanium interbody devices

AMagine is Stryker's proprietary approach to implant creation using additive manufacturing.

We built the world's largest and most advanced AM facility for orthopaedic implants – the AMagine

Institute – in Cork, Ireland. Through the AMagine Institute, a proprietary facility located in Cork,

Ireland, we deliver metal implants using AM – including the Tritanium brand implants.

Tritanium C

Featuring Tritanium In-Growth Technology¹

Highly porous titanium alloy material throughout cage²

Large central graft window

designed to maximize bone graft volume

Threaded inserter attachment

for rigid inserter-to-cage connection

Cascadia Cervical 3D

Featuring Lamellar 3D Titanium Technology

- ► Lamellar 3D Titanium TechnologyTM interbody with approximately 70% porosity³
- Rough surfaces throughout may allow for enhanced cellular activity 4,5,6
- ▶ Implant designed to accommodate sagittal lordosis

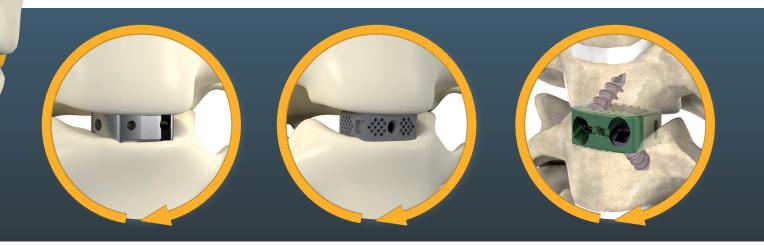

AVS Anchor C

Fixed height preservation

- ► Hollow PEEK cage with titanium self-locking screw mechanism for a secured fixation of the cage
- Rigid fixation without any added anterior profile to respect anterior cervical anatomy
- ► Angled and flexible instrumentation designed to help ease screw insertion and surgical technique

stryker

Ozark View

Anterior Plate

- ➤ Per-level, integrated locking cover provides clear visual and tactile confirmation of final lock position
- Strategically placed windows designed for increased graft visualization
- ➤ Accepts variable screws up to 30° conically for flexibility in screw alignment

Capri Cervical

3D Corpectomy Cage System

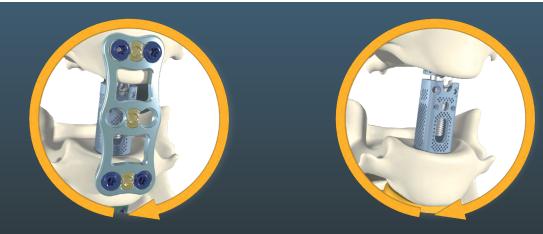

- Available in static and expandable options by to answer to surgeons' preferences
- Lamellar 3D Titanium Technology incorporates ► 300-500 µm longitudinal channels, which in conjunction with transverse windows, create an interconnected lattice design to allow for bony integration ^{3,7}
- Expandable option allows for continuous in-situ height \blacktriangleright adjustment and lordotic angulation

static

expandable

SILVERGlide and Malis

Bipolar forceps

The SILVERGlide reusable Non-Stick Forceps provides a range of sizes and styles engineered for precision and control.

- ► Silver plating assists in dissipating heat quickly, reducing collateral heating and hot spots that cause sticking⁸
- ▶ Malis single use forceps ensure precise tip alignment and repeatable coagulation performance⁸

Spetzler-Malis Disposable Non-stick Bipolar Forceps deliver balance, comfort and clear sightlines.

- ► Features proprietary non-stick technology in multiple designs (standard, slim and dual irrigating)
- ▶ Flexible and lightweight with fine-tuned spring force for added control

Adherus

Hydrogel Dural Sealant System

Helps to maintain dural closure during the critical phases of dural healing.

- ► Absorbs over approximately 90 days 10
- ▶ Pre-assembled applicator
- ▶ Delivery through a tight spray pattern
- Zero device related infections during the Pivotal Randomized Clinical Trial⁹

Signature

High Speed Drills

- Electric (πdrive, πdrive+) and pneumatic motors (Maestro Air and Maestro Air with handswitch)
- ▶ Comprehensive line of cutting accessories including iBur's tapered concave design enabling direct line of sight
- ► CORE 2 console provides exclusive I.D. Touch software enabling user to choose torque settings to customize drill performance

Sonopet iQ

Ultrasonic Aspirator

Precise, easy to use and versatile with unparalleled customization in bone cutting applications.

- Improved performance with more precise suction control and increased power¹¹
- Large selection of tips to handle soft tissue, fibrous tissue and bone cutting including Stryker's exclusive LT technology
- ▶ Pulse Control exhibits the ability to reduce temperature at the cut site beyond what power reduction achieve¹²

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of specific products before using them in surgery.

The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. The products depicted are CE marked according to the Medical Device Directive 93/42/EEC. Products may not be available in all markets because product

availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: Adherus, AMagine, Capri, Cascadia, Malis, Ozark, SILVERglide, Sonopet iQ, Stryker, Tritanium, Yukon.
